Lethabo Sekoto, AI Developer & Engineer | Full-Stack Developer | Software Engineer

Pretoria, South Africa, 0630295741, lethabosekoto@drivestedi.com

LINKS

PROFILE

Experienced Full Stack Developer and AI Developer with a strong Software Engineering background. Proven track record in creating efficient web applications and implementing AI solutions. Expert in MySQL, JavaScript, PHP, and machine learning. Skilled in managing complex projects across the full development cycle. Committed to continuous learning in web and AI technologies. Dedicated to driving innovation and enhancing team productivity through diverse technical expertise.

EMPLOYMENT HISTORY

Sep 2022

Full Stack Developer , Stedi (Pty) Ltd

As a Full Stack Developer at Stedi (Pty) Ltd, I am responsible for developing and maintaining web applications using a variety of technologies to create efficient and scalable solutions, ensuring seamless user experiences across different platforms.

- Utilize my expertise in JavaScript, PHP, Python, MySQL, SQL, Angular, Delphi, HTML, CSS, Machine Learning, and Deep Learning to develop user-friendly software products.
- Collaborate with cross-functional teams to gather requirements, design solutions, and implement new features, while participating in code reviews to enforce coding standards and ensure high-quality code.
- Develop a secure, API-driven web application with a modern, responsive user interface
- Implement a microservices architecture that improves system modularity and reduces dependencies between components
- Develop an automated system for deploying and managing changes across multiple environments
